

Comprehensive Online Tools

for
Planning, Managing
and Demonstrating
Learning Achievement

TaskStream
Advancing Educational Excellence

Implement Statewide Initiatives

School Improvement Initiatives

State and district leaders can easily establish a customizable network of tools for targeting goals, objectives and measurements to facilitate constructive discussion among collaborating parties and manage work flow and archive work-product in support of school improvement initiatives.

Data Analysis & Reporting

Identify areas for improvement with our robust data collection, analysis and reporting tools. TaskStream's reports provide information about student performance on targeted standards and competencies, and readily identify areas for improvement. Reports are easily generated at the individual, class, building, district or state levels.

Student e-Portfolios

Student e-portfolios demonstrate individual and programmatic achievement of articulated standards, skills or competencies. Examples of these programs include: graduation portfolio projects, articulation programs for educational advancement, Career Clusters, 21st Century Skills initiatives, writing programs, etc.

21st Century Skills

Design and share curriculum to advance program specific needs for the demonstration of learning achievement across the spectrum of pre-defined requirements for learner competency. Create rubrics that assess mastery of 21st Century Skills including problem solving, critical thinking, and communication skills. Showcase existing models of success.

Career Clusters

TaskStream's flexible, customizable and comprehensive electronic portfolio, competency assessment and standards-based instruction solution supports the development, implementation, management and continuous improvement of pathways for career and technical education initiatives.

Students are Learning...

Focus on Teaching and Learning

Student e-Portfolios

Demonstrate student achievement of skills, competencies and knowledge with electronic portfolios. **Assessment portfolios** are defined and constructed to scaffold the learning experience for the student and easily track progress against standards, goals or objectives. Robust reporting capabilities are available to demonstrate individual and programmatic success. **Showcase portfolios** are uniquely constructed by the student to demonstrate skills and mastery of concepts. **Resource portfolios** provide students with anytime/anywhere access to a central repository to create, archive and amend work product. Text, pictures, web-links, video or sound files can be attached. Portfolios may be shared with classmates for feedback, published to the web or downloaded to portable media.

Lesson & Activity Building

Taskstream's instructional design tools help educators create, organize and manage curriculum and build lessons and activities to map to learning standards. The Rubric Wizard coaches you as you develop customized rubrics from scratch, or adopt from a library of State/Local Education Agency rubrics. Share your evaluation rubrics, units and lessons across the school, district or state.

Standards Based Tracking

Create a customized target set of competencies and standards to align your curriculum, track standards and generate reports or use the Standards Wizard to choose from a comprehensive database of local, state and national standards. TaskStream's competency assessment capabilities enable educators to easily align skills, requirements, standards and other performance indicators with work products, artifacts and other learner evidence.

Professional Development

Standardize the delivery and tracking of all of your professional development initiatives with one simple and affordable toolset. Design and deliver specifically tailored professional development modules that readily reference and track teaching and learning standards and follow program activities directly into the student learning environment, where it counts. Share comments among instructors, mentors and participants for formative assessment and access reports to show participant progress and achievement.

Prove It with TaskStream!

About TaskStream

We advance educational excellence by providing our clients with the highest quality Web-based software and supporting services to efficiently plan and manage the assessment process, facilitate the demonstration of learning achievement and foster continuous improvement throughout the education network.

Client Services

Led by our team of experienced educators, our Mentoring Services and Solution Specialists provide the highest level of supporting services.
